

4 Player Pac Man

Game Description and How to Win

This game is pac man with 4 players. The same rules apply. In this game, there will be a total of 4 pac men. Each pac man must eat as many dots on the game maze as possible until there are no more game dots left on the game maze. Whichever pac man has the most game dots will win the round for that game.

Game Rules

While the pac men are competing for dots, there will be 6-7 ghosts that will travel throughout the game maze in order to attack the pac men. When a pac man runs into a ghost, that pac man will be eliminated from the game. The remaining pac men will be unaffected. If the pac man with the leading points meets a ghost, that pac man will be eliminated and the pac man who is in second place will now be in the lead.

At the end, the pac man who hasn't encountered a ghost and has the highest number of points wins the round.

Other Topics

When two pacmen run into each other, there will be no effect.
